

Add-on Description

Agile Filters for Jira add-on provides useful filters for JIRA Software Boards.

Without the sorting by users feature you had to create as many quick filters as assignees you have in your company.

With the Filtering on boards feature you can just set groups with assignees that you need and then select assignees from dropdown list right on board.

Go to Agile Filters Administration menu and select "Filtering on boards" tab.

The screenshot shows the 'Filtering on boards' configuration page. At the top, there are three tabs: 'Custom Fields Visibility', 'Custom comment', and 'Filtering on boards', with the last one highlighted. Below the tabs, there is a section titled 'Groups for assignee filtering'. It contains a search bar with 'Teamlead' and 'jira-administrators' entered. Below the search bar, it says 'Showing 5 of 5 matching groups'. A list of groups is shown: 'jira-core-users' (highlighted in red), 'jira-developers', 'jira-servicedesk-users', 'jira-system-administrators', and 'jira-users'.

Start to type group name to select one from dropdown list. Choose one or more groups to select users from them on the board later.

Then go to the board and select user in the assignee field to filter issues (the dropdown list shows first 20 matches):

The screenshot shows a Jira Kanban board titled 'My Lovely Work'. The board has a sidebar with 'QUICK FILTERS: My Issues UnResolved' and a list of issues. The main area shows a 'To Do' column with several issues. A dropdown menu is open over the 'Assignee...' field of an issue, showing a list of users. The dropdown is titled 'Showing 11 of 11 matching users'. The first user is 'Alexander Plotnikov (Teamlead)' (highlighted in red). Other users listed include Anton Kolin, Dmitri Abrosov, Maria Poffankova, Natalia Frantsuzova, Nina Lokotaeva, Oxana Alexeenko, Sergey Antonov, Katerina Rakovshik, Vladimir Nikolaev, and Anastasia Zarukina. A red arrow points to the dropdown menu.

Also the feature allows to search by summary field. When you enter the board all issues are opened that correspond to quick filters enabled.
