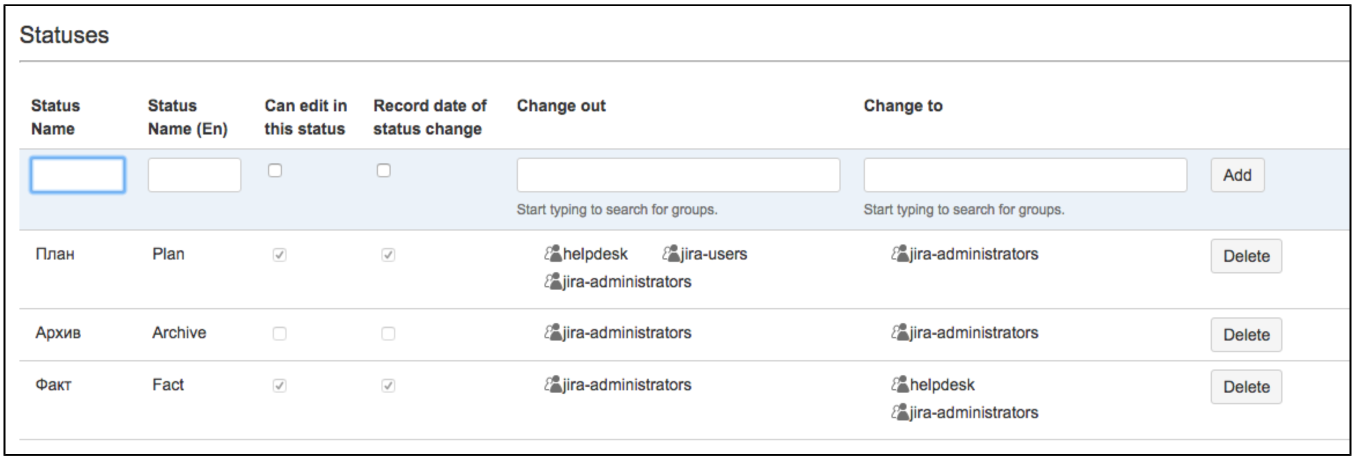
Transactions Statuses

In CRM Administrator Menu/Transactions Tab you can find Statuses Section where you can create statuses and adjust settings and rights to change statuses in transactions.



Setting name	Description
Status Name	Type in status name on default language.
Status Name (En)	Status name on English.
Can edit in this status	If checked Transaction is editable in this status. If unchecked Transaction is read only.
Record date of status change	If checked this status change date records in Status Date field type (Transactions attributes section in CRM Administrator Menu/Transactions Tab).
Change out	Select groups which can change from this status to another.
Change to	Select groups which can change from different statuses to selected status.
