

Custom Field - CRM Products Select / CRM Single Product Select

Custom field CRM Products Select allows to add one or more products from [CRM Products Directory](#) to Issue screens and to Service Desk Custom Portal. CRM Single Product Select field is the same but only one product can be selected.

Create new custom field:

Name your custom field and create at least 1 option (if the field is present and required) to proceed:

Configure 'CRM Products Select' Field

Name *

Description

Options *

☐ None

Next step is to add new field to screens you need and then press "Configure" field after creation.

Products list (Options) can be created 2 ways:

- manually - **Edit Options**
- automatically by importing all values from [CRM Products Directory](#) - **Edit Set up CRM products select field**

Configure Custom Field: Products

Below are the Custom Field Configuration schemes for this custom field. Schemes are applicable for various issues types in a particular context. You can configure a custom field differently for each project context or in a global context. Moreover, project level schemes will over-ride global ones.

Add new context

View Custom Fields

Default Configuration Scheme for Products

Default configuration scheme generated by JIRA

Applicable contexts for scheme: Edit Configuration

Issue type(s):

Global (all issues)

Default Value: Edit Default Value

Not defined

Options: Edit Options

None

Set up CRM products select field: Edit Set up CRM products select field

By clicking on Product name in Issue screen the Product card opens (if user has rights to Browse products) with ability to change data right in Products Directory (if user has rights to Edit Products):
