

Reset all settings to default

In the setting of the CRM (**Administration/Add-ons/CRM/Reset Data**) has 3 buttons:

1. **Delete all records and reset settings to default:** all your settings and records will be removed. And the initial settings.
2. **Delete all records:** delete all records of the following directories: Companies, Contacts, Products, Transactions. The directories that you have created, records will be saved.
3. **Reset CRM Cache:** CRM has a data cache for fast searching. It is used in transactions and exports. The button is needed to restore the cache if it has collapsed.

The screenshot shows the JIRA Administration interface. At the top, there's a search bar labeled "Search JIRA admin". Below it, a navigation bar contains links for Applications, Projects, Issues, Add-ons, User management, Latest upgrade report, System, and CRM (which is currently selected). On the left side, under the "CRM ADMINISTRATION" section, there's a list of options: Access, Companies, Contacts, Products, Transactions, Custom directories, Audit Log, Integrations, Direct Mail, Table lists, Budget, Custom fields links, Contact Synchronization, and a highlighted "Reset Data" button. The main content area on the right, titled "Delete all records and reset settings to default", contains three buttons: "Delete all records and reset settings to default", "Delete all records", and "Reset CRM Cache".
