

# CRM Security Levels

To set security levels to issues user must have access to Set Issue Security at project's Permission Scheme.

<b>Move Issues</b> Ability to move issues between projects or between workflows of the same project (if applicable). Note the user can only move issues to a project he or she has the create permission for.	Group (jira-software-users)
<b>Resolve Issues</b> Ability to resolve and reopen issues. This includes the ability to set a fix version.	Group (jira-software-users)
<b>Schedule Issues</b> Ability to view or edit an issue's due date.	Group (jira-software-users)
<b>Set Issue Security</b> Ability to set the level of security on an issue so that only people in that security level can see the issue.	Project Role (Administrators) Single user (Admin) Group (jira-administrators) Group (jira-software-users)
<b>Transition Issues</b> Ability to transition issues.	Group (jira-software-users)

In Issue [Security Scheme](#) create [Issue Security Level](#) to allow access to secured issues only to granted groups, users or roles.

On "Add User/Group/Project Role to Issue Security level" screen you can find CRM's Security groups:

## Add User/Group/Project Role to Issue Security Level

Issue Security Scheme: **Security**

Issue Security Level: **child**

Please select a user or group to add to this security level.

This will enable the specific users/groups to view issues for projects that:

- are associated with this Issue Security Scheme and
- have their security level set to **child**

☒ Application access

☐ User custom field value

☐ Project Role

☐ Reporter

☐ Holding employees

☐ Project lead

☐ Parent companies employees

☐ Company Assignee

☐ Company employees
