

Create Related Issues

HelpDesk adds to JIRA Issue interface **Create related issue** feature. This feature allows to create a linked issue with preset settings.

You may set:

- which fields should be copied from the old issue to the new one,
- should attachments be copied by default
- project and issue type for the new issue by default
- type of link

And more, you may predefine the new issue Description by highlighting any text in the old issue. This highlighted text will be copied to the new issue Description.

Add info

Create Issue Configure Fields

Project New test (NEW)

Issue Type Bug Set by default

Summary Add info in custom field Copied from original issue

Написать тему

Security Level None

Attachment Drop files to attach, or browse.

Due Date 05/05/16 12:00 AM Copied from original issue

Description

Assignee Automatic

☒ Copy attachments ☐ Create another Create Cancel

Create related issue option may be useful, when you track customers's tickets by HelpDesk in one JIRA Project (ex.Support) and sometimes you need to create linked issue in other JIRA Project (ex.Development).

Create related issue feature should be configured in **HelpDesk Administrator menu/ Related issues Tab**.
