

Hide Custom Fields Feature

Add-on allows you to hide custom fields from everyone except users of selected JIRA-groups.

Please notice that fields are hidden by JavaScript so the fields will be visible in page code and they can appear for a second during page loading. The feature might be used to remove some unnecessary fields from screens.

After add-on is installed press '**Configure**' button:

Teamlead ToolKit

Plugin with some useful postfunctions, validators, jql operators for JIRA.
